

EMPLOYEE SAFETY CLIMATE SURVEY

The Safety Climate Survey identifies critical factors that can be used to improve the safety climate of your workplace. This confidential information, provided by your employees, will identify key safety issues that can improve organizational safety. Results of the survey provide critical risk analysis that can be used in your company's planning cycle and safety strategy.

- Based on more than three decades of research into unsafe work behavior
- Employees complete the safety awareness index, identify key priorities and provide written comments
- Consists of 40 questions
- Conducted online or written questionnaire
- Customized according to demographics and respondents
- Report provides benchmark scores, identifies key concerns and concludes with specific recommendations

SAFETY AWARENESS INDICES
